## Uses

Chewing, pain relief, anti-inflammatory, diuretic

Coat Conditioning and temperature regulation

Used for pregnant does, summer cooling, stimulate appetite, diarrhea and safe introductory green for young kits use leaves and fruit, this is a very soothing to rabbits and can help cool rabbits in the summer heat by increasing circulation, awesome addition for pregnant does in the hot summer

Works in the same ways as Shepard's Purse. It can be used if doe has a hard time birthing or kit gets stuck. It will dilate the birth canal. Do not give while pregnant, wait until doe is due. It will induce labor. Also it will help in healing once kits are born.

Laxative, Increases milk flow of nursing does, helps with fevers, reduces stress

Pain relief, calm nervous rabbit, one of the best eye wash for weepy eye Chamomile tea and honey. Just make a cup of tea, a little stronger than you would drink it and add a teaspoon of honey. You can use as a compress and as a wipe for the eye. Let the rabbit eat some before you treat for eye problems because of its pain relief and calming effects will make the rabbit easier to handle

Anti-inflammatory, healing of cuts, molt

Healing of cuts, laxative

Respiratory expectorant

Healing, bone formation, ill rabbits, stressed and weak rabbits. The plant has a calming effect on rabbits Comfrey is a good source of vitamin A and good for pregnant and nursing does. It is a digestive aid, supports the immune system, and good for the stomach

Blood purifying, respiratory ailments, anti-inflammatory, bladder infections, diarrhea, milk flow of nursing does, good treat for does after having a litter. There have been tests on rabbits that were treated with dandelion's showing that it is effective against pneumonia, bronchitis and upper respiratory infections. Use fresh leaves, flowers and dig up root, the root can be dried to make a weak tea to add to the rabbits water. Well known for its curative powers. The bitter milky sap stimulates the working of all glands, including the milk glands of lactating does. The plant has both laxative and astringent qualities and regulates constipation and diarrhea

## Uses

Immune system stimulant and broad spectrum antibiotic. In the lower doses it's the stimulant and in higher doses acts as an antibiotic. Anti-inflammatory with anti-viral properties

Respiratory expectorant, fevers

Dried and powdered, and sprinkled repel fleas

Weepy eye wash

Bloating, gas, milk flow of nursing does

Immunize against disease, antiseptic, antibiotic, bloating and gas, wormer, respiratory expectorant. May be a little difficult to get the rabbits to eat however

Infertility in bucks

Milk flow in nursing does

Anti-inflammatory

Anti parasitic, fungicide, bactericide. Good to use as a natural wormer

Another good wormer for rabbits but hard to get mature rabbits to eat younger rabbits are more willing to eat it

Circulation problems, nervous stress, exhaustion, induces labor, helps expel placenta and other birth matter. Use in extreme cases only as this is a mild tranquilizer and affects the heart and blood pressure instead of the brain as an anti-stimulant

Anti-bacterial, antiviral, bloating and gas, diarrhea, reduce stress

Good for gastric inflammation and coughs

Laxative, helps with molting

Bruises, slowly healing wounds, ulcers, skin diseases, digestive problems

Coughs, inflammation of mouth, throat. Digestive problems, uterine discomfort, calm nerves

Weepy eye wash

Helps take ammonia from the blood and protects both the liver and the kidneys, increases milk flow in nursing does

## Uses

Firms loose stools, decreases the milk flow of does during weaning, DO NOT FEED to lactating does. Used for colds, eye inflammation, liver stimulant, and used to relax the muscles of the digestive tract and stimulate bile flow so mint is useful for indigestion, gas and colic. Avoid prolonged use as it can irritate the mucous membranes. Do not give any form of mint to young babies

Weepy eye wash

Strongly antiseptic

Increases milk flow in nursing does

Good for digestive problems, diarrhea, kidney and bladder problems

Enriches the blood, urinary problems. Roots are used for constipation and obstruction of the intestines. Good for the cure of inflammation of bladder & kidneys, digestive disorders, fertility in bucks, productivity in does

antimicrobial, antispasmodic, healing of cuts, respiratory expectorant, fevers. Leaves soothe urinary tract infections and irritations. Good for gastric inflammations

Wormer

Prevention and treatment of kindling problems like retained afterbirth. Improves condition during pregnancy, ensuring speedy and strong birth. Feed during the last two weeks of pregnancy

Weepy Eye

Lowers blood pressure, Ideal for exhaustion, weakness, and depression

dried and powdered, and sprinkled repel fleas, dry up does who's kits have been weaned. This herb should be used with caution and should be avoided during pregnancy

dried and powdered, and sprinkled repel fleas

bronchitis, sinusitis, neuralgia, rheumatism

Uterine disorders, A strong medicine for diarrhea. Use sparingly

Very cooling and soothing use in summer to help with high temperature

## Uses

Whole plant is antiseptic and cooling. Leaves are rich in iron and are supposed to prevent miscarriage. Externally used for inflamed areas, rashes and sore eyes

Good for diarrhea The stems and leaves are ideal for a use as a digestive remedy, warming for stomach ache, chills and associated diarrhea. Expels worms. Harvest before and during flowering in summer discard the woody stems

Intestinal inflammation. Willow twigs and leaves. Also a pain-reliever and possible natural coccidiostat
